JOINS & CORNERS

Profile corners and joins are welded providing a seamless transitions and no light leakage.

Custom angled joins on request.

Joins can be horizontal or vertical

LENGTH CALCULATION

Luminaires are constructed using a combination of gear tray module sizes

Module lengths start from 565mm and increase by 140mm increments to achieve the required length

Endcap assembly requires a 10mm allowance and for recessed luminaires. This dimension becomes the cut-out dimension

For specified lengths that fall between the 140mm increments powder coated blanking plates can be added to avoid any unlit diffuser sections.

Gear Tray Options: 565mm, 705mm, 845mm, 945mm, 1125mm, 1265mm, 1405mm, 1545mm & 1685mm

Length Example 1: 2400mm required length >> 1125mm Geartray + 1265mm Geartray = 2390mm

Plus 10mm for pair of endcaps = 2400mm

Length Example 2: 5100mm required length >> 1685mm Geartray x 3 = 5055mm

plus 10mm for pair of endcaps = 5065mm
